White Construction Group Announces Spyke and White as LEED® Accredited Professionals

CASTLE ROCK, Colo., Dec. 7, 2006 – White Construction Group, a Colorado-based construction firm, announces the accreditation of Junior Estimator Chris Spyke and Project Manager Courtney White as LEED® (Leadership in Energy and Environmental Design) Accredited Professionals.

Spyke joined the firm in 2006 and has rapidly become an asset to the company. He was instrumental in providing preconstruction services for the Courtyards at Briargate in Colorado Springs and for the expansion of the Wells Fargo Parking Lot in Littleton resulting in over \$6 million of new business. Spyke holds a Bachelor of Science degree in Industrial Technology Education from the University of Nebraska and an Associates of Applied Science degree in Engineering, Drafting and Design from Central Community College in Hastings, Nebraska.

-more-

White joined the firm in 2002 and serves as both a project manager and as the company's environmental manager. She holds a Bachelor of Science degree in Business Management with a minor in Spanish. She also has a Construction Management Certificate from Colorado State University. Her current projects are: Gym 2005, a gymnasium and retail building in Aurora; the renovation and restoration of the Manzanola Train Depot in Manzanola; tenant improvements at 18 South Wilcox Street in Castle Rock; and an On-Call construction services contract for the City and County of Denver.

A LEED® Accredited Professional can define green building, integrate whole-building design practices, offer environmental leadership in the industry, stimulate green competition, raise awareness of green building benefits, and help to transform the building market. LEED is a voluntary, consensus-based national standard for developing high-performance, sustainable buildings. Currently, White Construction Group has four LEED® Accredited Professionals.

“As more employees are LEED Accredited,” says President Timothy White, “White Construction Group can continue to offer assistance in the design and construction of high performance, environmentally sound buildings.”

About White Construction Group

Founded in 1985, White Construction Group is a fast-growing, multi-million-dollar general contractor that specializes in commercial construction, design-build, historic restorations and tenant improvement projects. The company provides pre-construction, construction management, general construction and post-construction services for public and private clients along the Front Range, northern and northeastern Colorado. To date the company has completed more than \$425 million in construction projects and has won several national awards for its job safety programs. White Construction Group can be reached at (303) 688-6924, or www.whitecg.com.
