**White Construction Group
Announces Samples as a LEED Accredited Professional**

CASTLE ROCK, Colo., March. 2, 2006 – White Construction Group, a Colorado-based construction firm specializing in commercial construction, design-build, historic restoration and tenant improvement projects, today announced the accreditation of Jared Samples as a LEED Accredited Professional. Samples, an estimator for White Construction Group since 2005, is the company’s first employee to earn this accreditation.

A LEED Accredited Professional can define green building, integrate whole-building design practices, offer environmental leadership in the industry, stimulate green competition, raise awareness of green building benefits, and help to transform the building market. LEED (Leadership in Energy and Environmental Design) is a voluntary, consensus-based national standard for developing high-performance, sustainable buildings.

“This accreditation is a tribute to Samples dedication to this industry,” says Tim White, president of White Construction Group. “We are proud and grateful for employees who take initiative in pursuing personal education that aligns with our company philosophy of leaving the world in better shape than we found it.”
